**Chinata Group (Pty) Ltd**

**Registration Number** - 2016/410010/07

**Company VAT Number** - 4960279844

 **Email** - [admin@chinatagroup.co.za](mailto:admin@chinatagroup.co.za)

 **Contact Number** - +27 (0) 82 481 5338

# ■ About Us

---

**Chinata Group** is an integrated solutions partner delivering end-to-end support to **mining, industrial, and utility asset operators**. We combine engineering **capability, manufacturing expertise, and strategic sourcing** to provide reliable, **cost-effective solutions** that enhance operational performance, extend asset life, and reduce total cost of ownership.

Our business is structured across five core divisions, each designed to operate independently while delivering greater value as a unified offering:

**Fabrication** – Precision driven fabrication services including **plasma cutting, welding, and machining**. We manufacture components and assemblies strictly to specification, supporting both new builds and refurbishment programmes with a focus on **quality, repeatability, and on-time** delivery.

**Foundry Casting** – Supply of high-quality cast components, including wear parts and critical spares, tailored for demanding mining and industrial applications. Our casting solutions are engineered for **durability, performance, and consistency** across operating environments.

**Hydraulics** – End-to-end hydraulic cylinder solutions, including design, manufacturing, **refurbishment, and repair**. We support clients in maintaining system **reliability and performance** through responsive service and technically **robust solutions** aligned to **OEM** standards.

**Indirect Sourcing** – A strategic procurement offering that simplifies and consolidates non-core spend across categories such as **PPE, consumables, tooling, and general industrial supplies**. We enable clients to **reduce procurement complexity, improve pricing, and maintain supply continuity**.

**Process Equipment as a Service** – A **flexible**, asset-light model providing access to mobile and modular process equipment through structured leasing solutions. This enables clients to deploy **critical equipment** without significant **upfront capital**, aligning operational needs with **cash flow efficiency**.

# ■ About Us

---

At our core, **Chinata Group** is built to bridge the gap between **supply** and **operations**. We work closely with **OEMs, mines, EPCs,** and **industrial operators** to deliver solutions that are practical, scalable, and commercially aligned. Our integrated approach allows us to support the **full asset lifecycle** – from supply and manufacture through to **maintenance, refurbishment,** and **operational support**.

As a **Level 1 BBBEE, black female-owned** business, we are committed to driving inclusive growth while delivering measurable value to our clients and partners across **Africa**.

**Chinata Group** – Integrated solutions for mining, industrial and utility assets.

## Vision

To be a leading African industrial solutions partner to the Mining, Oil & Gas, Construction, Energy, and Industrial sectors, recognised for innovation, reliability, and end-to-end delivery capability.

## Mission

To deliver high-quality, conformant products and services on time, tailored to specific project scopes and operational requirements, while building trusted, long-term partnerships based on reliability, efficiency, and technical excellence.

# ■ Our Core Divisions

## 1. Manufacturing, Fabrication, & Machining Division

Our Manufacturing and Fabrication Division specialises in the **design, engineering, manufacture, refurbishment, and commissioning** of custom steel equipment, spares, and plant components for heavy industrial environments.

### Core Capabilities

- ▶ Heavy, medium, and light **steel fabrication**
- ▶ **Precision CNC machining**
- ▶ Complex assemblies and structural builds
- ▶ Plasma cutting and profiling
- ▶ Seamless commissioning into live operational environments

### Key Focus Areas

- ▶ Structural steel and plant infrastructure
- ▶ Chutes, frames, supports, guards, and conveyors
- ▶ Buckets, booms, and mobile equipment components
- ▶ Custom-engineered OEM replacement parts

## 2. Foundry Casting Solutions

Chinata Group provides **ferrous and non-ferrous foundry and casting solutions** supporting mining, processing, and industrial applications. We specialise in the manufacture of **cast components to client drawings and technical specifications**, ensuring dimensional accuracy, material compliance, and repeatable quality.

### Services Include

- ▶ Manufacture of cast components to **drawing and specification**
- ▶ Wear-resistant and high-performance castings
- ▶ Replacement cast components for crushers, mills, pumps, & screening equipment
- ▶ Pattern design and development
- ▶ CNC machining and finishing of cast parts
- ▶ Refurbishment and reverse engineering of cast components
- ▶ Material certification and quality control to client and industry standards

This division supports both **OEMs and end-users**, delivering reliable, specification-compliant castings with consistent lead times.

# ■ Our Core Divisions

## 3. Hydraulic Cylinders Division

Chinata Group provides a **complete hydraulic cylinder manufacturing and refurbishment service**, supporting both **mobile equipment** and **fixed plant operations**.

### Capabilities

- ▶ Manufacture of new hydraulic cylinders
- ▶ Full refurbishment and rebuilds
- ▶ Honing, chroming, resealing, and rod repairs
- ▶ Testing, certification, and failure analysis
- ▶ Supply of seals, barrels, rods, and components

This division supports excavators, loaders, dump trucks, processing plant, and specialised industrial machinery.

## 4. Indirect Sourcing & Supply Solutions

Our Strategic Indirect Sourcing Division provides a **single-source procurement** solution for **capital equipment, spares, consumables**, and **specialist industrial** products through global OEM and supplier partnerships.

### Supply Categories *(Including but not limited to)*

- ▶ Maintenance, Repair & Operations (MRO) consumables
- ▶ Chemicals
- ▶ Pumps, Valves, Gears and Motors
- ▶ Tools, tooling systems and workshop equipment
- ▶ PPE, safety equipment and site consumables
- ▶ Electrical, mechanical and hydraulic consumables
- ▶ Industrial fasteners, fittings, hoses and seals
- ▶ Lubricants, oils and industrial fluids
- ▶ General spares and site consumables
- ▶ Logistics coordination and site delivery
- ▶ Complete Conveyor System Including Spares

# ■ Our Core Divisions

## 6. Processing Equipment as a Service (EaaS)

Chinata Group offers Process Equipment as a Service, enabling clients to **access** critical **equipment** through **OPEX-based** rental and **leasing models**.

### Equipment Offered

- ▶ Screens and screening plants
- ▶ Crushers and process modules
- ▶ Conveying systems
- ▶ Yellow metal (excavators, loaders, dump trucks)
- ▶ Modular and auxiliary plant equipment
- ▶ Complete commodity based processing plants
- ▶ Excavators
- ▶ Dump Trucks

### Benefits

- ▶ Reduced capital expenditure
- ▶ Fully maintained assets
- ▶ Flexible contract terms
- ▶ Improved uptime and predictable operating costs

## 7. Turnkey Project Support & Consulting

This division integrates **fabrication, manufacturing, sourcing, and equipment supply** to deliver complete, end-to-end project execution.

### Services

- ▶ Strategic procurement planning
- ▶ Supplier vetting and contract negotiation
- ▶ Project execution and installation supervision
- ▶ Capital equipment supply chain coordination
- ▶ Technical advisory and lifecycle cost analysis
- ▶ Integrated fabrication and procurement delivery

# ■ Certificates

---

Chinata Group operates in line with internationally recognised management systems:

- ▶ **ISO 9001**  
Quality Management
- ▶ **ISO 14001**  
Environmental Management
- ▶ **ISO 45001**  
Occupational Health & Safety

These certifications underpin our commitment to quality, safety, and operational excellence.

## ■ Import & Export Capabilities

### Imports

Capital equipment, machinery, consumables, and chemicals from global markets

### Exports

Custom-manufactured & engineered products from South Africa to international clients
